

I have been an amateur radio operator for over 40 years, since the age of 13. I want to express my serious concern about the deployment of BPL technology. Tests that the American Radio Relay League (ARRL) has conducted show that use of this technology in my neighborhood would make amateur radio operation extremely difficult, if not impossible. That would impede my enjoyment of this life-long avocation, but more importantly, it would impede my ability to provide communications in emergency situations, even when those situations are not in my immediate neighborhood, while the BPL would still be operational.

Please do not approve deployment of BPL!

Thanks!

William R. Moore
